Saul Newbury – Front-End Web-Developer

Personal Statement

I am a highly motivated front-end web-developer, currently working to deepen my knowledge of JS and become proficient with React, whilst familiarising myself with Express and MongoDB; paving a way to becoming useful across the stack, whilst building upon previous experience working with HTML and CSS (in a Wordpress environment).

I am excited for the opportunity to apply and further hone my expanding knowledge within a professional setting, complimentary to my forging a career as a web-developer.

I will bring tenacity and enthusiasm to your team, with an eye for detail and appetite for learning! I'd love the opportunity to chat further, please get in touch to explore whether we'd be a good fit for each other.

Hobbies & interests

In my spare time, I love building little JS apps that improve my coding ability. And whilst not at the computer, I love playing guitar and crafting songs, or getting out in nature, walking and cycling.
